27	The system has many challenges and is also not an easy to navigate system. One major challenge that I have had on many different occasions is that a client was opened to retention services in let's say 2008 but was never closed out of retention services. The system will still allow you with out closing the previous rent emotion services open a whole new retention services catagory for the client say in the year 2010. So now the client is opened for retention services twice and the original retention services entry is still opened so they are duplicated in the report. Then when adding services provided it is a constant update and change monthly and it leave huge room for interpretation since you may provide the service 1x, but when put in the system it has to be for the whole month so some services you provide 1x looks like you provided all month.	4/2/2014 4:56 PM
28	over the years and through the upgrades it has become easier to use.	4/2/2014 4:16 PM
29	Quick	4/2/2014 3:38 PM
30	Good support services. If we have a problem or question the folks at Data Remedy are very responsive.	4/2/2014 3:21 PM
31	I like that when I am entering information for a clients new entry into a program, the information already in the system auto-fills things like race, name, DOB, etc.	4/2/2014 3:06 PM

1	The required data entry doesn't capture the services provided or the complexities of the client's situation.	4/16/2014 3:44 PM

4	it would be helpful to add a check off for keeping clients out of jail or hospitals and a easier way to up date that also make a list of clients to fix.	4/10/2014 3:45 PM

7	Family entries are confusing.	4/9/2014 6:19 PM
8	Does not sync with other HMIS programs. Don't like the back-dating to enter data.	4/9/2014 11:34 AM
9	Make it easier to enter multiple entries and easier to determine which section to enter what data where.	4/8/2014 4:28 PM
10	Hard to access the agencies specific info in report form when in the system.	4/8/2014 3:21 PM
11	It needs a better way to add in data, WAY too confusing, and far too many steps.	4/8/2014 2:15 PM
12	If I can run an entry exit report and generate a list it should then be able to generate a list with entry and exit dates not just names	4/8/2014 1:20 PM
13	I would like to be able to see my service notes and not have to click on each entry to read what was entered.	4/8/2014 12:50 PM
14	I feel as if there may be glitches in the system. When I look at data reports I notice information that I know was entered is reported as missing.	4/4/2014 11:21 AM
15	The data entry process for ServicePoint sometimes seems more cumbersome/complicated than needed, especially for new staff due to expected high turnover. Instructions and trainings are unclear, abrupt and inconsistent.	4/4/2014 9:55 AM
16	The navigation has quirks. I wish on the services page I could date sort or that the information was listed by date.	4/3/2014 11:12 PM
17	Need to be able to run reports myself and to run reports for my board, workflow changes are annoying- would be good to have the system prompt you in a userfriendly way	4/3/2014 4:00 PM
18	No. I am glad it is easy to have questions answered and mistakes corrected when needed.	4/3/2014 3:58 PM
19	I do not believe that all data that is entered comes out in reports and I am not certain why that is.	4/3/2014 2:45 PM
20	It does not accurately reflect the work we are doing with clients. For example, entering services once a month for someone, and only entering one type of service even if we have provided that service on multiple accounts, does not accurately show how much work we are really doing with someone.	4/3/2014 12:51 PM
21	It doesnt have the option to put in much of the data I need to serve me clients well... hence the need for a second data entry program.	4/3/2014 11:26 AM
22	Have one on one data quality checks to make sure that all data will be correct and not interfere with the reports.	4/3/2014 8:49 AM

HMIS Stakeholder Survey

23	The system is not well structure and is never going to give a very accurate picture of what a program may be doing. Also the questions you answer which should have a actual answer still gives you options for really only opened answered responses.	4/2/2014 4:56 PM
24	we cannot seem to customize and/or run our own reports - we are always needing to go to the administrator - not at all convenient!	4/2/2014 4:16 PM
25	No concerns	4/2/2014 3:38 PM
26	It's not very user friendly and I don't like the backdate button	4/2/2014 2:44 PM
27	Would like more ability to customize the assessments without needing to request it from IT, also more ability to customize reporting.	4/2/2014 2:44 PM
28	There are times when the same data has to be entered. There needs to be adjustments to service forms and services in the system to reflect all services provided. Sources of income need to be updated, there are choices missing.	4/2/2014 1:55 PM
29	Match the intake form Easy navigation within the system	4/2/2014 1:36 PM

17	multiple.	4/3/2014 11:26 AM
18	I have two data systems and I rely more heavily on Tracking At A Glance then I do service point. I can access notes and different entry exits with ease and I can also without having to provide a rather lengthy round about way to get the answers I may need like how many clients are opened to the program and opened in my caseload and can even make the search rather specific such as by year, by month, or even by specific milestones, which would technically correlate to entry/exit in service point. However the thing with entry exit is that they are in in one program, but this doesn't necessarily point out specifics with the client. A perfect example is that a client may be housed for a year, and you then close them but what if a client has been housed for two years but because they aren't still involve in the program you may have exited them so there really is no way to continue that they are still sustaining a residence. The system also I'm not entirely sure would be capable of keeping and tracking this information.	4/2/2014 4:56 PM

1	It's a nice timeline to look through.	4/10/2014 10:09 PM
2	we do not share.	4/10/2014 3:59 PM
3	We only share information with one other agency, and it is easy to do.	4/10/2014 9:06 AM
4	Appreciate a statewide HMIS so that people are not duplicated - do not need to share other data	4/9/2014 11:42 AM
5	Do not use for this information	4/9/2014 11:01 AM
6	This works if all agencies involve enter their services. This works especially for case management. If client is receiving case management at another agency you can see that service so you don't have to have to provide it and enter all the data in again.	4/9/2014 10:35 AM
7	Opening individual client records is simple and easily managed. We rely on case managers at a number of agencies around the state to provide services. ServicePoint enables us to open a record in the Program Office, share it with a regional office for case management, and track case management activity statewide. We use ServicePoint as our primary document repository for all client records, and as a result central office staff and regional staff alike can see all information for a case.	4/8/2014 1:46 PM
8	Currently don't share data but would like to be able to	4/4/2014 5:04 PM
9	I like that we COULD share data if everyone used the single system. Service Point has the capability to but isn't used by everyone. I would like to reduce individuals and families having to keep giving their private information and re-telling their stories over and over again. Further, its easier to see who else is working without clients to avoid duplication of services.	4/4/2014 3:24 PM
10	The potential to share data between agencies will help increase effectiveness of programs, awareness of client service provisions, improved inter-agency coordination, eligibility determination, de-duplication of services.	4/4/2014 10:07 AM
11	I can log in from anywhere to check in across all the sub contracts I manage.	4/3/2014 11:17 PM

1	not much.	4/10/2014 4:12 PM
2	Just like in other areas Service Point makes it easy.	4/10/2014 9:19 AM
3	I have recently been granted report generating capabilities, but have not had a chance to utilize them. Believe this will be very helpful.	4/9/2014 11:45 AM
4	We depend on the ART report capability to create a wide array of reports to support internal agency and programmatic reporting. When necessary, we can easily export to Excel and create a wide variety of reporting instruments.	4/8/2014 1:56 PM
5	I think this could be expanded in Service Point. The ability of the system now is great; however, I would like to be able to create my own customizable reports that I use on the program-level without having to understand the complexities of the ReportWriter feature which is not particularly helpful.	4/4/2014 3:29 PM

1	well it dose not serve all our clients.	4/10/2014 4:43 PM
2	I do not run reports, have no knowledge of this.	4/10/2014 1:15 PM
3	It holds everything I need to serve my clients.	4/10/2014 9:56 AM
4	Several ways: I can track progress, assess the client's program history through past records, see trends, see reminders for follow-ups, etc.	4/4/2014 3:36 PM
5	At this point, we only use the system as a reporting tool.	4/4/2014 12:51 PM
6	I just know that because of these reports we are able to receive the grant funding which then allows us to serve our clients	4/3/2014 4:17 PM

1	There is a lot of data entry every day which potentially takes away time that I would be directly helping the clients.	4/10/2014 10:27 PM
2	all of the data could be better if we all had a better system.	4/10/2014 4:43 PM
3	None.	4/10/2014 9:56 AM
4	EMR system which could be our only system (vs. currently where we use ServicePoint for grant requirements and Foothold as our in-house database)	4/9/2014 11:52 AM
5	Would like to see it used more effectively for planning purposes. There are hurdles to getting there- especially cost of additional licenses for more efficient entry, quick agency-level reporting, and ability to share data with multiple other systems.	4/4/2014 12:51 PM
6	nothing at this time	4/3/2014 4:17 PM
7	Able to run reports about outcomes to analyze	4/3/2014 4:11 PM

#	Responses	Date
1	It would be great if VSHA could be connected to Service Point	4/11/2014 12:56 PM
2	I would like to have a better system for agencies state wide.	4/10/2014 4:43 PM
3	Service Point is an easy system to use if you invest the time to learn how to properly use it.	4/4/2014 3:36 PM
4	The HMIS administrator experiences consistent disorganization due to capacity and/or competency challenges when differentiating between some agencies and programs, including when providing reports to one provider agency that is meant for a different one.	4/4/2014 11:37 AM
5	I only put the 3 items above not because they are not available or adequate at this time but because I could probably use the training and data to my benefit if I had the expertise, knowledge and time to do so.	4/3/2014 4:17 PM
6	I don't think that service point is the best and most practice system to use. I think that the program has a lot of room for error at this point and to much room for interpretation. I think this also sometimes can help programs that may not be really providing a lot of the expected and necessary services to look like they are. There isn't a real accuracy in the data and sometimes you may be working with a client on a lot more than you are able to portray in the data entry provided through service point.	4/2/2014 6:02 PM
